

Jordan Nguyen,

Jr. Biomedical Engineer

Phone: 514-588-5920

Email: jordannguyen129@gmail.com

Recently graduated from Polytechnic Montreal with a bachelor's degree in biomedical engineering with a concentration in Project Management, I have a wealth of diversified knowledge and experience accumulated through multiple school projects, internships as well as relevant work experience. I am passionate of the medical device industry and my goal is to continue to enhance and refine my knowledge and to work on the development of new and innovating as well as safe and high-quality technologies and products.

Work experience

Quality Team Member (April 2019 > April 2020) – Novo Électronique

- **Head Quality Resource:** Participate in the development of new and innovative products related to the Medical Device field. Assist clients with product certification (EMI/EMC, FCC, WIFI and Bluetooth) planning, regulatory analysis (Implement conformity matrix for standards such as ISO-10993, IEC62366, IEC60601-1 and UL1069/UL2900) and risk management with respect to ISO14971. Assure that all User Needs, Design Inputs and Specification and Risk Control Measures relating to safety are properly implemented.
- **ISO 13485 certification:** Assist in putting in place a QMS in time for audit requirements. Help in responding to audit findings. Writing and adapting forms, Standard Operating Procedures, Work Instructions and Quality Manual. Address all nonconformities and initiate quick containment actions.
- **Lead Verification and Validation activities:** Manage ECRs (Engineering Change Requests) on released Novo products. Ensure that all added features function within the existing system through Integration and Regression Verification. Implement with the help of software, firmware, hardware and mechanical engineers test cases and lead in their execution. Writing test plans and reports.

Quality Engineer (May 2018 > March 2019) – Kinova Robotics

- **Project quality engineer (PQE):** Support, collaborate and manage the development of new robotic arm products. Auxiliary to the product manager and product owner. Develop certification of product (CE, EMI-EMC and FCC). Lead and maintain Risk Management Activities such as Hazard Analysis, dFMEA and pFMEA. Strong understanding of quality standards: IEC60601-1, ISO13485 and ISO14971.
- **Supplier quality:** lead the process of certification and qualification of suppliers and assist in any quality issues such as supplier corrective actions (SCAR) and material conformities (inspection).
- **Ensure compliance to the QMS:** Execute Non-conformities, CAPA, and Change Control procedures as well as lead and support quality protocols in different other departments such as Manufacturing engineering, Quality Control, ERP, production and VnV.

System Design Intern in CAS R&D (January 2017 - May 2017) – Zimmer Biomet

- Design and fill quality documentation related to the development of PSI (Patient Specific Instrumentation) products and provide update to the design history file and device master record.
- Ensure that quality standards are followed during development to guarantee safety and efficacy of products.
- Write testing protocols for new software in development and proceed with verification and validation of products by executing and documenting tests.

Client Technical Support intern (Jan 2016 – Sept 2016) – Dassault Systèmes

- Analyze and sort technical issues reported by clients and maintain effective communication until issue is solved.
- Support usage of Dassault products such as Catia, Enovia and Delmia by external customers.
- Ensure proper protocols are respected regarding product lifecycle management (PLM)

Production coordinator (Aug 2015 – Jan 2016) – V2R Biomedical

- Assist dental professionals in the selection of the appropriate patient treatment plan (prosthetic implant positioning).
- Develop automation system in order to accelerate planification documentation and 3D model generation of jigs.
- Coordinate exchanges with surgical dentists and provide virtual planification of treatment and CAD modelling.

Education

Bachelor's degree in biomedical engineering (Sept 2013 - May 2018)

Polytechnic Montreal - Concentration in project management
